

## STEP BY STEP TREE PLANTING

- Step 1: Dig the planting hole. It should be slightly deeper than the root ball of the tree and up to three times as wide.
- Step 2: Loosen the roots and soak the root ball.
- Step 3: Fix the stake in place.
- Step 4: Place the tree in the centre of the hole.
- Step 5: Work mix of soil and compost in around the roots and firm in.
- Step 6: Tie the tree. ..
- Step 7: Water the tree thoroughly!
- Step 8: Add Mulch.
- Step 9: Put rabbit guard on tree to protect young trunk.
- Step 10: Water frequently during dry weather.
- Step 11: Remove tree tie once root is well established, usually in second year.

**A tiny  
acorn can  
produce  
an Oak  
Tree over  
20m tall!**

**Never forget YOUR  
greatness.**

An **Oak tree** is a daily reminder that great things often have small beginnings." — Matshona Dhiwayo. ...
